

# Symptoms of Coronavirus (COVID-19)

Cough

Fever

Muscle Pain

Shortness of breath  
or difficulty breathing

Sore Throat

New loss of smell

Symptoms can range from mild to severe illness and appear 2-14 days after you are exposed to the virus that causes COVID-19.

If you experience any of the above symptoms with a body temperature  $\geq 37.5$  C in combination with the following exposure risks in the past 14 days, visit the ARI (Acute Respiratory Infection) clinics in **camp hospitals immediately**:

1. Travel to, or lived in, area with ongoing outbreaks of COVID-19;
2. Worked closely with tourists or in crowded areas involving contact with many people;
3. Visited crowded community or areas (market, shopping mall, clinic/hospital, public transport);
4. Contact with confirmed COVID-19 case.

Help us protect your family members, relatives, friends, and other camp residents by visiting the Acute Respiratory Infection (ARI) clinics if you experience the above symptoms and risk exposure.
